

ROBIN VON MALOTTKI

Data Engineering and AI Automation

contact@robinvm.de | [LinkedIn](#) | [GitHub](#) | [n8n Creator](#)

EXPERIENCE

Data Analyst 06/2025 – present Engel & Völkers

- Advanced SQL modelling with dbt in Google Cloud (BigQuery) – modelling, testing and documentation
- Design and deliver dashboards and ad-hoc analyses as a self-service offering for business teams
- Work closely with Operations and Sales stakeholders, largely on CRM data; translate business questions into analyses
- Own data quality: automated consistency checks that detect inconsistencies and notify the responsible owners
- Column-level impact analysis: track which columns feed which dashboards and use cases, and alert owners before breaking changes land
- Built an AI review skill into the Git workflow – runs changed code on every merge request, executes tests and evaluates execution cost
- Develop and deploy forecasting models, replacing manual estimates with statistical methods

Professional Development & Publications 07/2024 – 05/2025

- Completed the Microsoft Azure Data Engineer and Databricks Fundamentals certifications
- Author at Towards Data Science (curated publication) – three articles with over 10,000 combined reads:
- [ETL Pipelines in Python: Best Practices and Techniques](https://medium.com/data-science/etl-pipelines-in-python-best-practices-and-techniques-0c148452cc68)
medium.com/data-science/etl-pipelines-in-python-best-practices-and-techniques-0c148452cc68
- [Efficient Testing of ETL Pipelines with Python](https://medium.com/data-science/efficient-testing-of-etl-pipelines-with-python-f4373ed5a5ff)
medium.com/data-science/efficient-testing-of-etl-pipelines-with-python-f4373ed5a5ff
- [Techniques for Chat Data Analytics with Python](https://medium.com/data-science/techniques-for-chat-data-analytics-with-python-cfdbea358123)

Data Consultant 2021 – 07/2024 The Information Lab

Client project: international pharmaceutical company

- Fully automated data pipelines using KNIME Business Hub
- Built and maintained Tableau dashboards across several projects
- Consolidated the marketing dashboard landscape

Founder & Private Tutor 2016 – 2021 VM Nachhilfe UG / self-employed

- Mathematics tutoring for A-level and university students; client acquisition, marketing and website
- Created learning materials and tracked progress through a continuous scoring system

Marketing Assistant 2016 – 2018 Domino's Pizza Deutschland GmbH

- Analysed coupon data; supported the brand transitions of Joey's Pizza and Hallo Pizza

SKILLS

- SQL, Python
- dbt – data modelling
- Google Cloud (BigQuery)
- Data quality and testing
- n8n – automation
- LLM APIs (OpenAI, Claude)
- Tableau, Power BI
- Machine learning, Git

CERTIFICATIONS

- dbt Fundamentals (2024)
- Azure Data Engineer (2024)
- Databricks Lakehouse (2024)
- SQL Advanced, HackerRank (2024)
- Power BI Data Analyst (2023)
- Tableau Certified Data Analyst (2022)

EDUCATION

B.Sc. Economics
University of Hamburg
2014 – 2021 · Grade 2.3 (German scale)
Studied alongside self-employment and part-time work

LANGUAGES

- German – native
- English – C1
