EXPERIENCE

Data Analyst 06/2025 – present

Engel und Völkers

- Gather business requirements from finance and controlling stakeholders and translate them into scalable analytical solutions
- Build and maintain reliable datasets and reporting tables with SQL and dbt in BigQuery, including tests and documentation
- Design, build and optimise Tableau dashboards as a self-service offering for business teams
- Define and continuously develop KPIs, metrics and reporting standards together with stakeholders
- Ensure high data quality through testing, validation and automated consistency checks that alert the responsible owners
- Column-level impact analysis: tracks which fields feed which dashboards and use cases, and warns owners before breaking changes land
- Analyse trends and opportunities, including forecasting models for revenue planning that replaced manual estimates

Professional Development and Publications 07/2024 – 05/2025

- Completed the dbt Fundamentals, Microsoft Azure Data Engineer and Databricks Lakehouse Fundamentals certifications
- Author at Towards Data Science and Towards Data Engineering, writing on building, testing and quality-assuring ETL pipelines:
- [ETL Pipelines in Python: Best Practices and Techniques](#)
- [Efficient Testing of ETL Pipelines with Python](#)
- [A Python Library every Data Engineer should know \(Great Expectations\)](#)

Data Consultant 2021 – 07/2024

The Information Lab

Client project: international pharmaceutical company

- Fully automated data pipelines using KNIME Business Hub
- Combined internal financial data with external market data into a shared basis for decisions
- Built and maintained Tableau dashboards and consolidated the dashboard landscape

Founder and Tutor 2016 – 2021

VM Nachhilfe UG / self-employed

- Mathematics tutoring for secondary school and university students; client acquisition, marketing and website

Marketing Assistant 2016 – 2018

Domino's Pizza Deutschland GmbH

- Analysed coupon data; supported the brand transitions of Joey's Pizza and Hallo Pizza

SKILLS

- SQL – analysis and modelling
- dbt – transformation
- Tableau, Power BI
- Data warehouse concepts
- Data quality, testing, validation
- KPIs and reporting standards
- Python, Git
- n8n, LLM APIs

CERTIFICATIONS

- dbt Fundamentals (2024)
- Azure Data Engineer (2024)
- Databricks Lakehouse (2024)
- SQL Advanced, HackerRank (2024)
- Power BI Data Analyst (2023)
- Tableau Certified Data Analyst (2022)

EDUCATION

B.Sc. Economics

University of Hamburg

2014 – 2021 · Grade 2.3 (German scale)

Studied alongside self-employment and part-time work

LANGUAGES

- German – native
- English – C1
